fuska

KOÇBEY GROUP, with 20 years of experience and expertise in the natural spring water industry, operates under the “FUSKA” brand at its modern facilities located in the Sapanca region, home to one of Turkey’s largest natural spring water reserves.

The economic value of water is determined not only by its quality but also by its proximity to markets with high consumption demand. In line with this, FUSKA stands as one of the leading brands in the industry, with extensive water reserves and facilities located close to major consumption centers such as Istanbul and Ankara.

Our source is covered with snow for five months of the year and is completely isolated from external factors, ensuring the preservation of its purity. Our production process is carried out by our expert team using state-of-the-art infrastructure, with a commitment to delivering water—the essence of life—to consumers in its most natural form.

Our **Spring** Water

It is sourced from the natural springs in the Sapanca region.

Our source is located 22 km away from our plant and is entirely surrounded by nature.

This special spring water, unaffected by environmental pollution, contains none of the chemicals (such as ammonium, nitrite, arsenic) that can be found in underground water within certain limits. This quality makes our water both reliable and a preferred choice among consumers.

IDEAL and ALKALINE

PH 7,9

SMOOTH TASTE

Conductivity
148 µS/cm

LOW SODIUM

4,2 mg/L

RICH MINERAL

Calcium
Magnesium
Potassium

The mineral values of our two sources being close to each other allows them to appeal to different tastes.

Our **Mineral** Water

It is sourced from the natural springs in the Sapanca region.

Our source is located 25 km away from our plant and is entirely surrounded by nature.

This special spring water, unaffected by environmental pollution, contains none of the chemicals (such as ammonium, nitrite, arsenic) that can be present within certain limits in underground waters. This feature makes our water both reliable and a preferred choice.

IDEAL and ALKALINE

PH 7,7

SMOOTH TASTE

Conductivity
148 µS/cm

LOW SODIUM

4,6 mg/L

RICH MINERAL

Calcium
Magnesium
Potassium

The similarity in mineral content of our two sources allows them to appeal to different taste preferences.

PET BOTTLE 0.2L
