About Us

Nudo, Türkiye's first domestic instant noodle brand, has been growing steadily since first meeting consumers in 2013 by expanding its product range.

Behind this young and dynamic brand stands Eris, a company with over 100 years of experience in the food industry. While developing NUDO products, we combine the flavor traditions of Anatolia with modern dietary habits and the evolving taste preferences of younger generations. Another key source of inspiration is the noodle culture that originated in the Far East and has spread across global cuisines, being reinterpreted within each culture.

Established in 2023, the Eris R&D Center conducts numerous innovative projects in the food sector and stands as Türkiye's first and only R&D center specialized in noodles, guiding Nudo's innovative product development vision.

Produced in compliance with international food safety standards, Nudo is audited under the BRCGS and ISO systems and is also certified with the GIMDES Halal Food Certificate. Vegan compliance certificates are available for selected product groups.

Eris's principle of "never offering consumers any product that would not be served at its own table" is reflected throughout Nudo's entire production approach.
