Delivering Quality & Authenticity Worldwide

ABOUT US

CNG Cengiz Tedarik Dış Ticaret A.Ş. is a food company that develops, produces, and delivers food products inspired by traditional Turkish cuisine to consumers through various sales channels, with its production infrastructure in Kemalpaşa, İzmir, and its ZEL brand.

At our facility, which brings together meat processing, cold storage, and various production lines, we manufacture products across several categories, including marrow bone broth, traditional soups, ready meals, frozen products, and other value-added food categories. In our product development approach, we place great importance on bringing the well-known flavors of our cuisine together with accessible and practical products that suit today's consumer habits.

Through the ZEL brand, we deliver our products to a broad consumer base via national retail chains, regional and local sales points, e-commerce platforms, HoReCa businesses, and corporate business partners. By managing all processes within an integrated structure, from production and purchasing to sales and logistics, we aim to provide reliable and sustainable solutions for our business partners.

In order to continuously develop our product portfolio, we place strong emphasis on R&D activities and closely follow changing consumer expectations, new product categories, and international food trends. In line with this approach, we participate in international fairs and organizations with the products we develop, while continuing to grow our brand in overseas markets.

Quality and food safety form the foundation of our production approach. In accordance with the certifications we hold, particularly the FSSC 22000 Food Safety Management System and the ISO 9001:2015 Quality Management System, we carry out our production processes in a systematic, traceable, and high-standard manner. We further strengthen our responsible production approach through our work in areas such as vegan products, halal production, and zero waste.
