ENTERPRISE OVERVIEW

Founded in 1988, Foshan Ceng Ceng Gao Food Co., Ltd. (CCG) is headquartered in Foshan, Guangdong Province, China. For further development, CCG invested in constructing a new intelligent, flexible production base in 2026 and set up its wholly owned independent subsidiary, Guangdong Jiehong Yili International Food Co., Ltd. (JHYL), to manage and operate it. Rooted in the manufacturing of baking powder and custard powder, the company has evolved steadily over decades and built a solid reputation as a leading manufacturer within China's food additive industry. Our modern production plant covers an area of 32,000 square meters, with a total investment of 120 million RMB.

Driven by sustained sales growth and continuous production upgrading, CCG has broadened its product portfolio to cover a comprehensive range of premium food ingredients and additives. Our core product lineup includes yeast, bread crumbs, bread improvers, calcium propionate, emulsifiers, solid and liquid flavorings, instant beverage powders, as well as animal feed and nutritional additives.

Endowed with decades of profound industry experience, CCG always keeps a keen insight into global market trends and customer demands. Beyond our self-operated manufacturing base in Foshan, we have also invested in multiple high-potential industrial projects as a strategic shareholder, undertaking professional overseas market analysis and global export operation management.

Adhering to strict quality standards, CCG's products are well-sold across domestic markets and over 116 countries worldwide. Our flagship brand Double Star Baker is fully registered for all product categories and widely recognized globally for stable quality and reliable performance. In addition to our independent brand business, we also provide customized private label (OEM/ODM) services for numerous well-known international enterprises, delivering tailored solutions to meet diverse market needs.

CAKE GEL EMULSIFIER

SERIES OF PRODUCTS

Cake emulsifier, also known as cake gel, is a compound food additive. As a cake foaming agent and foam stabilizer, it is widely used in baking industry. Cake emulsifier is an excellent cake improver formed with translucent soft gel, which gives high dough tolerance to mechanical handling, resulting rapid expansion to the batter and finer crumb structure. The dosage is 3-5% based on egg. Different models are available.
