AYINTAP

In 1933, in the historical Şehreküstü Elmacı Bazaar area of Gaziantep, the journey that Tahir Çavuş started with determination and passion came to life in a small workshop under the name ALTINFİL ŞEKERLEME. In its early years, this small business grew with the diligent efforts of family members, quickly gaining attention both inside and outside the city. Mehmet Tahir Efendi, who inherited his father Tahir Çavuş's legacy, worked tirelessly to advance the business further, and in 1992, with the vision of the 3rd generation representatives, stepped into the production of nuts, turning the business into a company. This deep-rooted legacy was further strengthened with new investments in 2017 with the participation of the 4th generations and was restructured under the name Ayıntap Tarım.

Today, this journey continues with utmost attention to the finest details of the supply chain, from fields to homes, with the brands Mesut in the nuts product group, Mr. Crispy in the chips product group, and Ardente in the hot beverage product group. Our facility in Gaziantep, established on a closed area of 10,000 square meters, continuously expands its customer network through traditional channels and retail sales channels spread across Turkey. Our products are produced with great care and in accordance with the Turkish Food Codex, without human touch, on fully automatic machines. By exporting to many countries in Asia, Europe, and Africa, we contribute to the national economy. We continue our journey with the goal of always providing the highest quality, considering worker-employer harmony with determination and perseverance.

As we always say

"We have skillfully processed the highest quality products we have taken from the soil for you."
