PALTRADE

Services Catalogue

Supporting Palestinian companies and exporters

PalTrade works to strengthen the capacity of Palestinian businesses to compete internationally and to expand opportunities for sustainable export growth.

Our Role

- Palestine Trade Center (PalTrade) is a non-profit, membership-based organization established in 1998, with a national mandate to lead export development as a driver of sustainable economic growth.
- PalTrade's work is focused on helping Palestinian businesses strengthen their export readiness, connect with international markets, and improve the visibility and competitiveness of Palestinian products and services.

Service Areas

Export readiness	Guidance to help companies assess their readiness for international markets, identify gaps, and prepare practical next steps.
Market intelligence	Market information and research support to help businesses understand target markets, buyer expectations, competition, and market-entry considerations.
Business matchmaking	Support for connecting Palestinian companies with potential buyers, importers, distributors, and relevant business partners.
Trade fairs and exhibitions	Information and support related to trade fairs, exhibitions, and business events that can help companies present their products to international audiences.
Capacity building	Training and knowledge-sharing opportunities designed to strengthen export skills, business presentation, and understanding of international trade requirements.
Promotion and visibility	Opportunities to showcase Palestinian products and companies through promotional activities and business networks.

Working with Companies

- Services and activities may vary according to sector priorities, available programmes, eligibility criteria, and project resources.
- Companies are encouraged to prepare an updated company profile, product catalogue, export capacity information, certifications where applicable, and clear contact details.

This catalogue is a general overview. Please contact PalTrade for current services, programmes, eligibility, and availability.
