GENERAL INFORMATION

From Orchard to Excellence

Gazelli Grup is an established export house dedicated to sourcing the world's finest walnut varieties from premier growing regions and delivering them to international markets with uncompromising quality.

Our portfolio includes Chandler, Xin2, Type 185, Serr, Tulare and Howard varieties, carefully selected from orchards in Chile, the United States, China and Argentina — each origin chosen for the distinct character it brings to the kernel.

Every shipment is processed under controlled sanitary conditions, screened for impurities, and packed to specifications that meet the most demanding global buyers.

PRODUCT RANGE

Eight Distinct Classifications

No. 01

Extra Light Halves

Our most premium category. Composed exclusively of walnut halves with a pale colour and impeccable form — ideal for sophisticated presentations and gifting.

No. 02

Light Halves & Quarters

A natural blend of halves and quarters. Clean, well-dried kernels free from excessive defects and damage. Versatile for both retail and ingredient use.

No. 03

Quarters

Natural walnut quarters that pass through a 16 mm screen but are larger than 12 mm. Optimal for culinary applications and toppings.

No. 04

Combo Mix

A carefully balanced combination of halves and pieces. Designed for broad use across food service and home applications.

No. 05

Medium Pieces

Pieces that pass through 11 mm and are retained on 8 mm. Optimised for bakery and confectionery applications.

No. 06

Small Pieces

Smaller pieces passing 9 mm and retained on 6 mm. Ideal for sauces, breads and finished baked goods.

No. 07

Combo

A select blend of halves and pieces — a versatile multipurpose grade for clients who require flexibility.

No. 08

Baker's Pieces

Pieces passing through a 3/8″ square screen and larger than meal. Engineered for industrial bakery operations.

COLOUR GRADING

Standard Colour Classifications

Each kernel is sorted under controlled lighting against the recognised industry colour reference. The lightest grade in every category establishes the benchmark — a guarantee of consistency from box to box, container to container.

GRADE I

Extra Light

No more than 15% may be darker than extra light, of which only 2% may be darker than light.

GRADE II

Light

No more than 15% may be darker than light, of which only 2% may be darker than light amber.

GRADE III

Light Amber

No more than 15% may be darker than light amber, of which only 2% may be darker than amber.

GRADE IV

Amber

No more than 10% may be darker than amber. A robust grade prized for its depth and richness.

GRADE V

Yellow

A distinctive golden tone reserved for specialised applications and select export markets.
