ABOUT OUR COMPANY

For 25 years, creating drinks has been our passion. This passion led us to the idea of adding coffee drinks — one of the world's most beloved beverages — to our portfolio.

We are able to produce coffee drinks in a wide range of flavours. These may include classic black coffee and white coffee, as well as various options tailored to our Clients' requirements, such as: sweet coffee, milk coffee, flavoured coffee, and more.

Our beverages are produced in state-of-art facility using highly advanced equipment and technology. This enables us to offer drinks with a shelf life of up to one year, which do not need to be stored in refrigerators.
