team serving the human wholeheartedly!
——President

Xinglongken provides a pathway by which farm-grown organic products are turned into the healthy food you serve at your table.

FOCUS ON ORGANIC
SINCE 1997

Backgroud

Good faith builds xinglongken

“Dalian Xinglongken Organic Products Co., Ltd. was established in early 2000. A pioneer of the organic food processing and trading in the emerging Chinese market, XLK improves quality control and traceability thereby ensuring organic integrity. Organic agriculture cares food safety, human health and environmental protection. That is just our mission which always guide us to apply our expertise in the areas of cultivation, processing and trading to ensure the highest quality for our customers.”

Your leading global supplier of organic animal feed

Dalian Xinglongken Organic Cereal and Oil Co.,Ltd. is one subsidiary of XLK, which was established in 2005. We specialize in processing and trading of organic edible oil and organic animal feed including organic soybean meal, organic flaxseed meal, organic sunflower meal and so on. We have excellent reputition with our customers due to quality. Since 2010, we have become top-three supplier for organic animal feed inChina. We select organic ingredients as raw material, with the traditional non-pollution pressing techniques and the modern equipments, to produce the original ecological organic edible oil which retains the original nutrient components.

Our Brand

ECO-TOWN

“After 5 years of sustained effort, we built successfully our own organic food brand ' ECO-TOWN'.
ECO-TOWN has offered over 50 organic products into the high-end shopping mall, big supermarket and organic speciality store in the first-tier cities of China for nearly 10 years.
ECO-TOWN today has become a renowned brand in organic industry of China, and also is welcomed in US, Australia, New Zealand and Canada.

ECO-TOWN reflects our idea:
Respecting nature
Protecting nature
Conforming to nature
Showing nature”

Authorized Certification

Make our organic business more professional!

01

Since 1997, XLK has begun to implement organic management and certification for the farms. Right now, XLK owns 18 organic farms, located in Heilongjiang, Liaoning and Inner Mongolia with the total area of 37323.5 hectares. This extensive operation involves over 30 varieties premium organic products: organic beans, organic grain and organic oilseeds.XLK has obtained international and domestic certifications from a variey of authorized organizations including BCS, ECOCERT, OFDC and SGS.

EU organic certification since 1997
USDA NOP organic certification since 1997
OFDC organic certification since 1997
JAS organic certification since 1997
GMP+B2 feed certification since 2009
HACCP certification since 2002

Xinglongken prides itself on supplying the high quality organic products that exceed international certification standards.

Quality Control

"XLK' s investment in test equipment and training demonstrates an uncompromising commitment to product quality

A leader in China' s organic foods industry,XLK utilizes world-class state-of-the-art methods and equipment for product testing and analysis to insure product quality.

Analytical test equipment by PertenInstruments chosen for proven reliability,accuracy and customer service/support.

Lab technicians are trained by Perten China onthe operation of Perten 8800 and 7250 analyzers for standard testing procedures and custom test suites. Provides condence in the accuracy and integrity of testing for all key parameters relating to XLK' s bean and seed products for both human food and animal feed applications.

Service contract with Perten China provides weekly remote equipment diagnostic checks to insure accuracy and precision of all testing results. Any recalibration of parameters isperformed by Perten technicians via direct telecom link. Weekly scheduled calibration checks provide confidence in test reliability,assuring that XLK is maintaining strict lab control standards.

xinglongken "QA/QC+" industry leading quality assurance & quality control

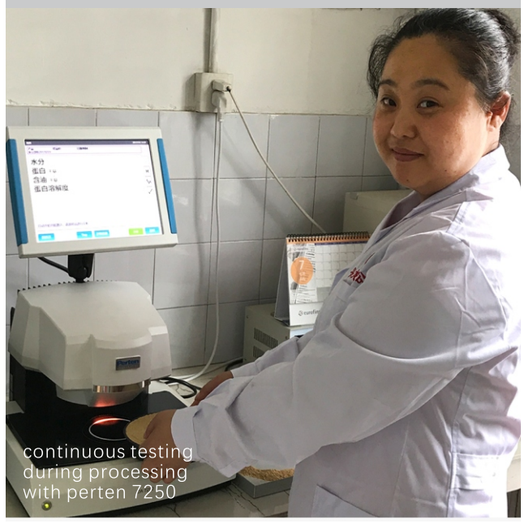

"QA/QC+" is a 4-phase process fortesting and retesting to insure quality

1. Field testing of raw beans and seeds using Perten 8800 NIR digital analyzer.
2. Real-time testing during product processing using Perten 7250 Lab NIR analyzer.
3. Daily testing in XLK' s in-house analog lab.
4. Final quality confirmation at Dalian Beiliang Inspection Labs prior to shipment.

Test results are compared for consistency to confirm that final product meets customer specifications prior to loading and shipment.

testing raw soybeans with perten 8800

XLK' s QA/QC+ system for advanced product testing is the gold standard in china' s organic foods industry.

continuous testing during processing with perten 7250

XLK' s sample storage library

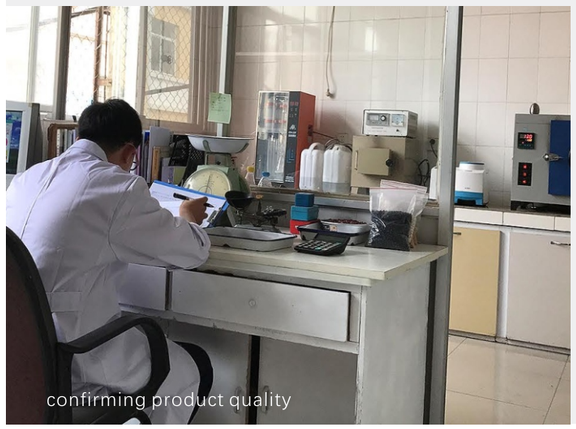

XLK is a pioneer in China' s organic foods industry,with world-class state-of-the-art product quality testing & analysis

XLK uses the Perten 7250 Lab NIR digital analyzer for continuous testing during the production cycle. The 7250 generates spreadsheets and graph reports for analysis with test results for each of the key component parameters. This provides precise real-time monitoring so that technicians can adjust equipment during processing for any changes in plant environmental conditions that could impact quality of the finished product.

XLK's "QA/QC+" testing and analysis:
1. raw product field testing
2. real-time production testing
3. analog lab testing
4. final confirmation testing at Beiliang inspection lab

XLK' s a nalog test lab was China' s first testing facility at a internationally certified organic bean and seed processing site. This lab provides daily test results that are compared to the realtime test results from the Perten 7250 Lab NIR analyzer. This serves as a final in-house confirmation that all test parameters support XLK' s product specifications.Performs standardized testing for moisture,protein,oil/fat, urease, KOH protein solubility, ash and aflatoxin B1.
