Ningbo Jill Star Food Co., Ltd. operates as Plant No. 2, occupying a modern, smart production base spanning over 30,000 square metres. With a daily production capacity of 70 tonnes and an annual comprehensive capacity of up to 25,000 tonnes, the company is a professional, large-scale manufacturerof biscuits and cookies, integrating R&D and innovation, smart production, custom contract manufacturing and global trade. Strategically located in the core industrial zone of the Yangtze River Delta and benefiting from the convenient logistics of Ningbo Beilun Port, the company is built upon high-standard hardware infrastructure, end-to-end intelligent management and a rigorous quality control system. It specialises in the R&D and mass production of bakedgoods. Thanks to its consistent quality, flexible production capacity and professional services, it has become a trusted long-term strategic contract manufacturing partner for renowned domestic and international brands.The company operates three high-end, intelligent specialised production lines. Equipped with top-of-the-range industry machinery and featuring scientifically optimised process layouts, these lines enable the flexible mass productionof a wide range of products, including shortbread, filled biscuits, thin crisp soda biscuits and spray-coated crystallised biscuits. Line 1 is a 1200-type fullyautomatic biscuit production line equipped with Sandvik special steel belts; Line 2 is a 1-metre mesh belt multi-functional filled crisp biscuit production line; Line 3 is a 1-metre mesh belt high-precision production line suitable for the production of shortbread, thin crisp, soda and various spray-decorated biscuits,greatly enriching the product portfolio and scope for customisation.The company has established a highly qualified professional R&D team, with all core technical staff holding postgraduate degrees. It brings together specialists in food science, process development and quality control, possessing a solid theoretical foundation and extensive practical industry experience. The team has deep expertise in the baked and snack food sector, specialising in product formulation R&D, production process iteration, taste innovation and upgrading, and the development of healthier food products. It possesses core capabilities in independent new product development, customised product design and the resolution of production technical challenges. The team is able to precisely match the consumer demands and industry standards of different global markets, using its robust R&D capabilities to lay a solid foundation for product innovation and serve as the core technical support for the company's sustainable development.Regarding raw material control and production safety, the company adheres to stringent standards: no peanut ingredients are used throughout the entire process; eggs are added exclusively in the form of egg powder, with no fresh eggs used; and allergen and food safety risks are mitigated at source. Our entire production line is equipped with Mettler-Toledo metal detection equipment as standard, whilst we have also introduced AI visual inspection and the IFS quality traceability system. This has enabled us to establish a comprehensive intelligent control system covering the entire process from raw material intake, production and processing, through in-line inspection, to the dispatch of finished goods. We have successively obtained internationally recognised food safety certifications such as BRC and FSSC 22000, ensuring a robust compliance framework and quality standards that align with international benchmarks. In terms of the supply chain, the company has established a fully traceable system, sourcing premium natural ingredients from around the world. Core ingredients include coffee powder imported from Indonesia and whole milk powder from New Zealand. We are committed to using natural, unadulterated ingredients and never use blended ingredients, thereby fortifying our quality control at the source.Leveraging three decades of craftsmanship and robust production capabilities, the company has forged deep partnerships with numerous renowned brands, including Costa and Tims. Its client portfolio spans Japanese retailers such as Don Quijote and ALDI as well as domestic chains like Freshippo and Costco, alongside prominent snack brands and retail chains such as Laopo Daren, Baicaowei and Bestore. The company holds its own import and export licence. Leveraging the efficient logistics of Ningbo Beilun Port, our products are exported to regions including Southeast Asia, Europe, the Americas and the Middle East, earning widespread recognition from customers worldwide. We consistently prioritise quality through craftsmanship, safety through standardisation, and service through flexibility. Leveraging intelligent production lines, a robust quality control system and an efficient supply chain, we continuously provide global clients with customised contract manufacturing and standardised product supply across the full range of biscuits and cookies. We are committed to becoming a highly competitive, global specialist service provider in the premium biscuit sector.
